Dear Partner,

The **information provided on the HAWB is incorrect** and requires a “Sita Telex Amendment” from the Airline.

The HAWB is used by the Thai Customs Authority as a manifest and is used as the main document for customs clearance procedures. Thai Customs is very strict on this matter and we **can not clear this cargo** until we have the HAWB Telex Amended by the Airline stating the correct information.

The **CORRECT** information is stated in the **BODY** of the **EMAIL** this letter came on and examples of the problem and solution are stated on the second page of this letter.

Thailand is unique as it is probably the only country in the world that requires this to be done. The Airline **can and will do this** Telex Amendment for the HAWB. Please urgently contact the Airline and have them send the “Amendment” to destination airline – In case they do not understand or refuse to do, please have them check with their BKK branch who will be able to explain what they need to do.

Please confirm that this has been done, and send us a copy of the Telex to allow our airport staff to trace and clear this shipment ASAP.

This cargo is urgently required – please do as per our instructions to avoid any unnecessary storage charges.

If you have any questions, please call or email us.

Thank you,

East-West Logistics Co., Ltd.
